PROJECTS

Farm Product Trading Website

- Crafted an interactive Farm Product Trading Website with **HTML**, ensuring a user-friendly and responsive frontend experience.
- Implemented a robust Java-based backend to enhance farm profitability by maximizing net profit and minimizing operational costs.

Smart Contact Manager

- The contact manager is a web based tool designed to efficiently store, organize and manage a user's contact in one location, facilitating easy access.
- The application is built on Spring Boot by integrating **MySQL** for data storage and **Spring JPA** for database access and manipulation. The user-friendly interface was developed using **HTML/CSS** and **Bootstrap**

Covid-19 Data Analysis

- Developed Covid-19 Dashboard using **Tableau** to analyze global cases, deaths, and recoveries.
- Performed exploratory data analysis with **SQL** to prepare the Covid-19 dataset for visualization.

CERTIFICATES

- ORACLE ACADEMY - Java Fundamentals.
- Microsoft Azure AI Fundamentals.
